Bath Benches

- Bath benches help patients who have difficulty sitting in a standard bath tub or standing in the shower
- Benches with a back give extra support and comfort
- Stools without a back provide easy access and maneuverability when bathing
- Non-slip, rubber feet resist slipping on the bathtub or shower floor
- Legs are height-adjustable for a proper fit

G98027

Premium Padded Bath Bench

Extra thick padding on seat and backrest provides additional comfort for long term use. Bench features an extra deep seat 16.5" (42 cm), for greater stability and comfort when bathing.

MDS89755R

Standard Composite Plastic Bath Bench

Durable and rustproof all-plastic construction. Comes with an extra deep and wide seat for user comfort. Removable arms help aid patient balance, but can be removed for easier transfers.

G30402

Basic Bath Bench

Textured, blow-molded polyethylene seats have built-in hand holds to provide extra safety. Angled legs distribute weight over a large area to increase patient stability. Durable anodized aluminum frame is rust resistant.

MDS89745AXW

Premium Bariatric Bath Bench 550 lb Capacity

Dual cross brace with durable welds provide extra stability and support. Bench has a blow molded seat with high-strength, aluminum frame to prevent rusting.

MDS89745RA*

Standard Bath Bench with Arms

Ideal for patients that need extra support when getting on and off the bench. Padded hand-grip for comfort also reduces slipping.

MDS89745R

Basic Bath Bench

High Density, polyethylene seat and back with built-in hand grips. Angled legs distribute weight over a large area to increase patient security. Durable, anodized aluminum frame is rust resistant.
