

Be ready for your needs
today and tomorrow with
a better bariatric solution.

The Hill-Rom® Bariatric Portfolio

Hill-Rom

Enhancing outcomes for
patients and their caregivers.

According to the World Health Organization's obesity and overweight fact sheet, 500 million adults, 20 and over, are classified as obese.¹

With obesity trends on the rise, health care professionals must be ready to provide care for an increasing population of bariatric patients. From lower acuity care to the ICU, hospitals are facing unprecedented challenges as they adjust to accommodate a diverse set of unique medical needs.

Be ready with products that work together to meet the needs of these patients, while also helping you do your job better.

Be ready with a Total Bariatric Solution that helps get patients mobilized, protects their skin and provides dignified care.

With a comprehensive bariatric portfolio,
Hill-Rom can help you be ready.

Be ready for a better solution.

Hill-Rom's bariatric products and services help improve the way bariatric care is provided at every step of recovery.

BETTER CARE

Because of their unique medical demands, bariatric patients require special attention and extra care.

Our products offer easy-to-use, integrated features designed to help you do your job—whether that means helping you perform routine tasks more efficiently or helping patients get on their feet more easily.

BETTER EXPERIENCE

Delivering care takes more than the right equipment—it requires a comprehensive approach to recovery.

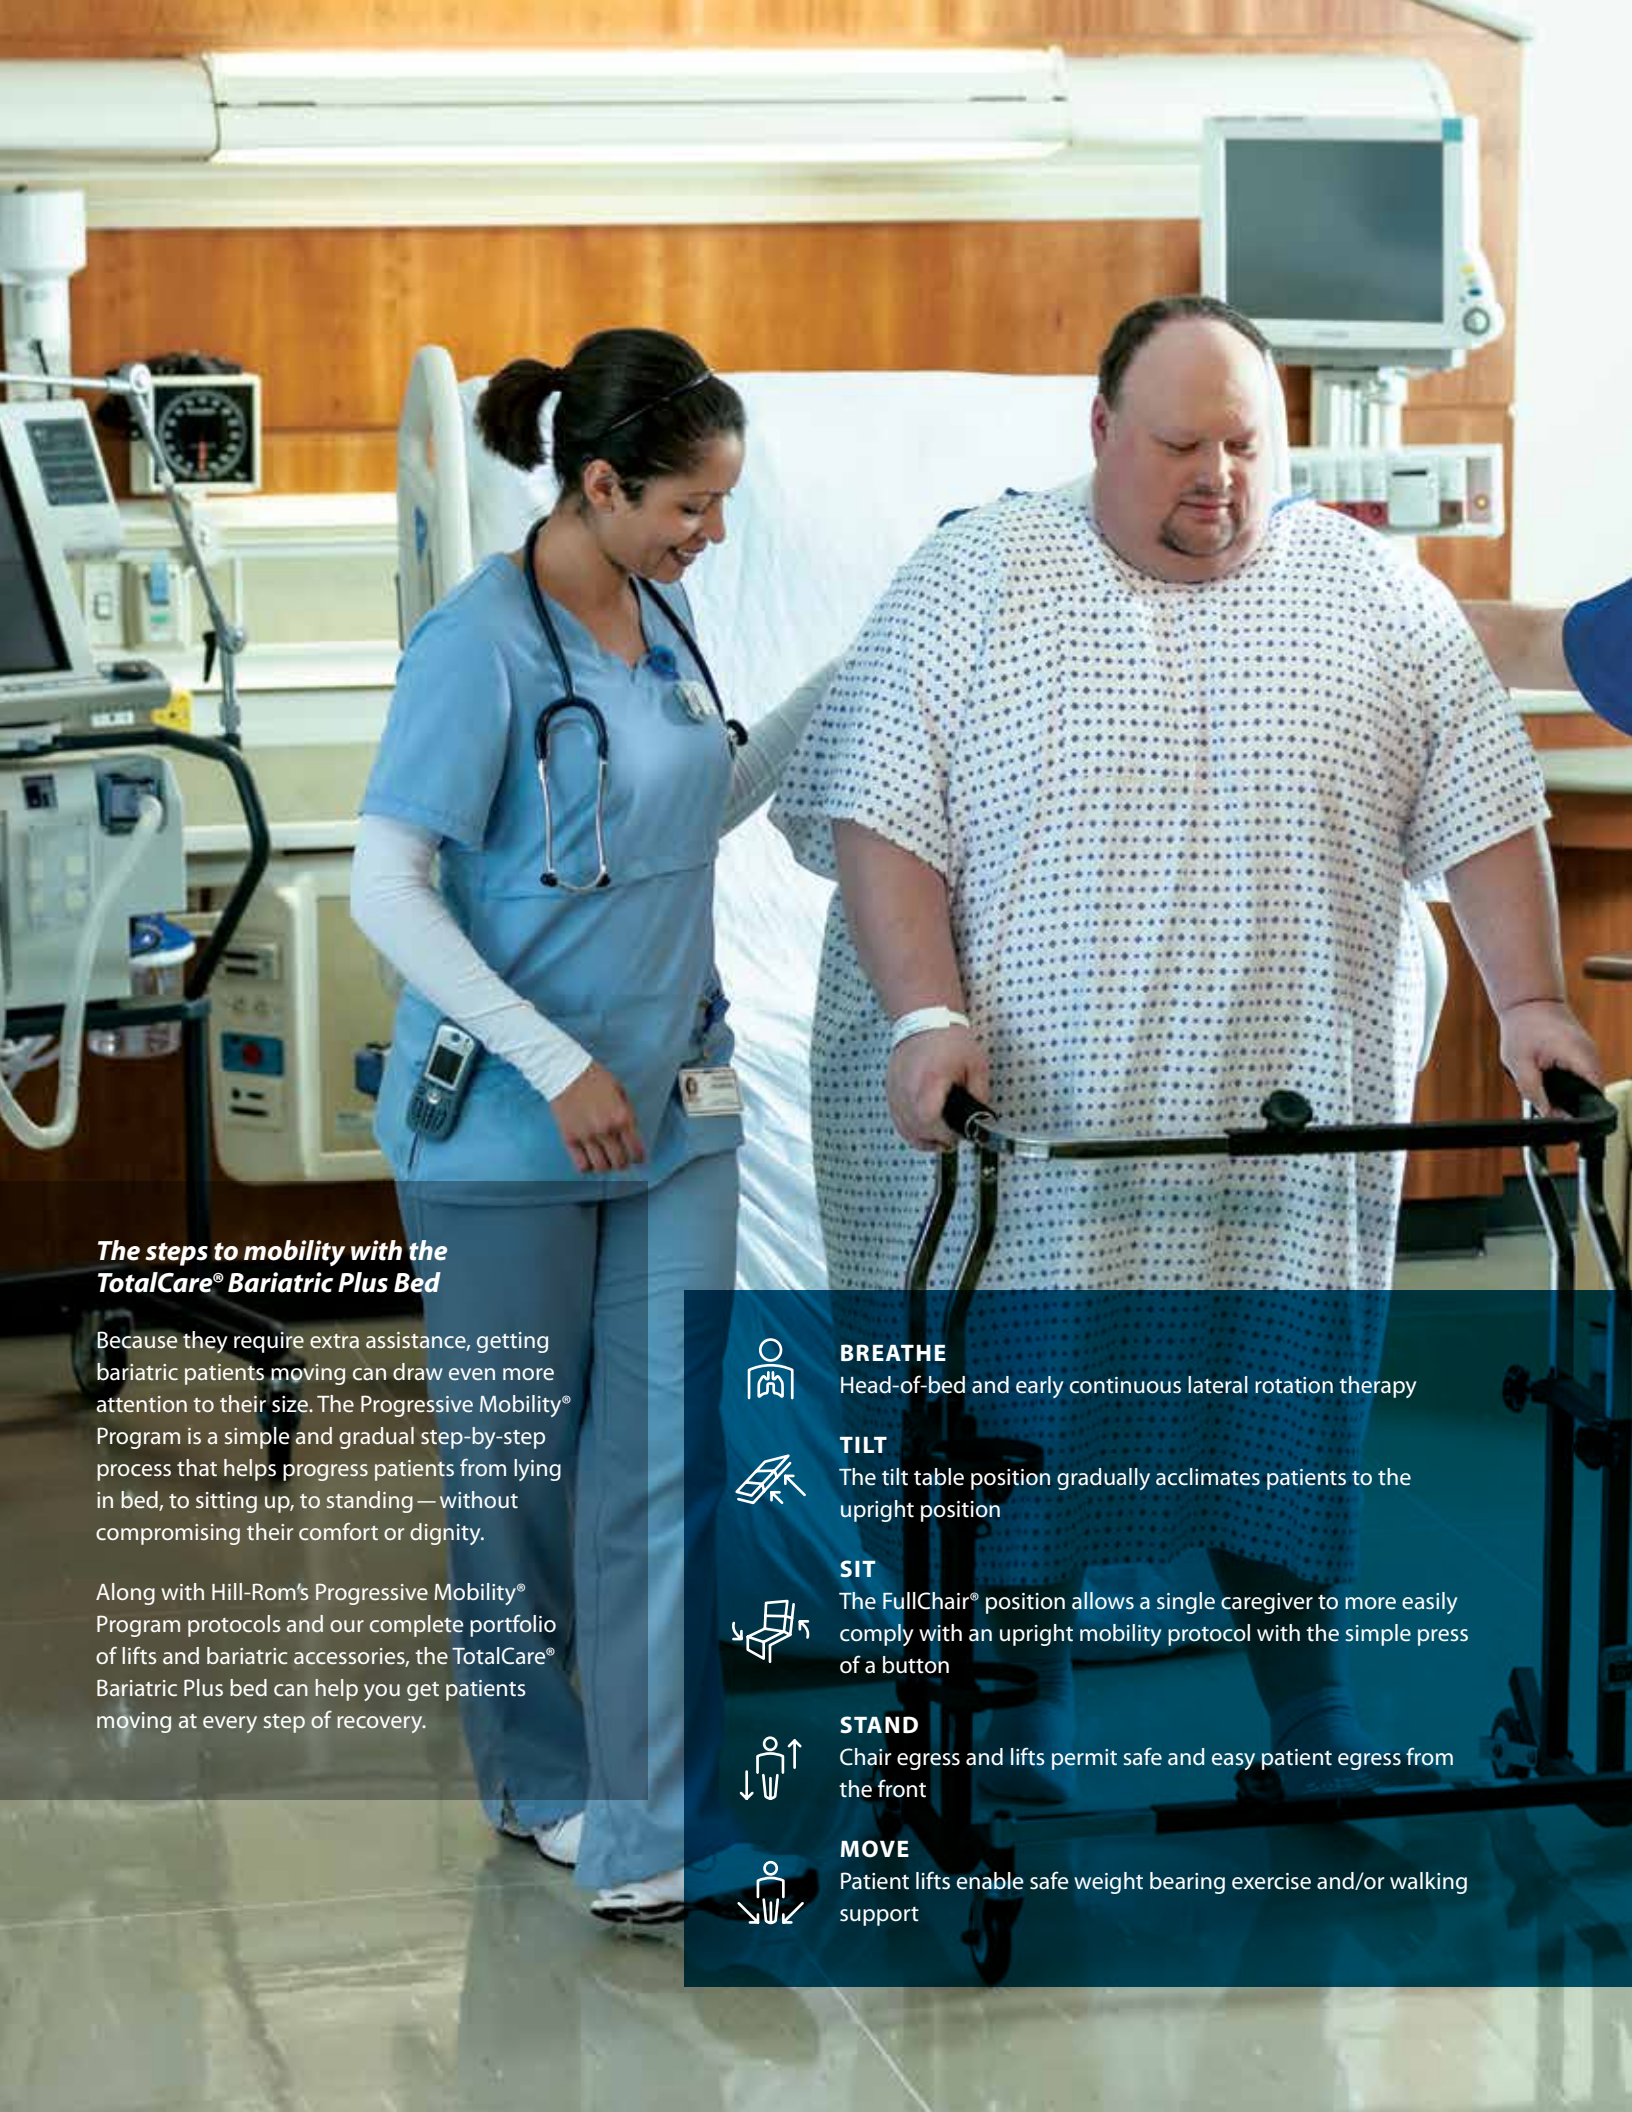

With decades of experience, we have the expertise and skills needed to create efficient, seamlessly integrated environments for bariatric patients.

BETTER SOLUTIONS

Many bariatric patients suffer from multiple health problems associated with obesity, which can put even more strain on resources and staff.

As a leading supplier of advanced hospital equipment and technology, we offer solutions that help you provide personalized care for patients.

The steps to mobility with the TotalCare® Bariatric Plus Bed

Because they require extra assistance, getting bariatric patients moving can draw even more attention to their size. The Progressive Mobility® Program is a simple and gradual step-by-step process that helps progress patients from lying in bed, to sitting up, to standing — without compromising their comfort or dignity.

Along with Hill-Rom's Progressive Mobility® Program protocols and our complete portfolio of lifts and bariatric accessories, the TotalCare® Bariatric Plus bed can help you get patients moving at every step of recovery.

BREATHE

Head-of-bed and early continuous lateral rotation therapy

TILT

The tilt table position gradually acclimates patients to the upright position

SIT

The FullChair® position allows a single caregiver to more easily comply with an upright mobility protocol with the simple press of a button

STAND

Chair egress and lifts permit safe and easy patient egress from the front

MOVE

Patient lifts enable safe weight bearing exercise and/or walking support

Be ready for a comprehensive solution.

For needs across the care continuum, Hill-Rom's innovation and clinical expertise can help you be ready.

Hill-Rom's bariatric beds are durable and reliable, offering the same great benefits and aesthetic design of standard patient equipment with the added capacity to meet the unique needs of bariatric patients.

No matter the need — from the ICU to post-operative recovery, Hill-Rom has a solution to:

KEEP PATIENTS' SKIN SAFE AT ANY ACUITY LEVEL

Hill-Rom offers a portfolio of weight-based pressure redistribution surfaces that automatically adjust to a patient's weight, size, movement and bed position to prevent and treat pressure ulcers while keeping patients comfortable.

ASSIST PATIENTS AT ANY POINT-OF-CARE

All Hill-Rom® products, from beds to accessories, work seamlessly together to simplify the way patients are handled — from routine tasks such as linen changes to transferring and repositioning.

EASY PATIENT HANDLING

We make products that allow for greater patient independence, comfort and, most importantly, preservation of dignity. With our Progressive Mobility® Program and patient-assist features, we can help you move patients more easily and get them moving in fewer steps.

The TotalCare® Bariatric surface goes beyond standard care by addressing pressure, shear, friction and moisture, the four main causes of pressure ulcers.

High-end acuity

TOTALCARE® BARIATRIC PLUS BED WITH INTEGRATED LOW AIR LOSS SURFACE AND CLRT AND PERCUSSION & VIBRATION MODULES

- Supports patients up to 500 lbs with a 40-inch surface
- Integrated air surface automatically adjusts according to patients weight, body type, movement and bed position to help prevent and treat pressure ulcers*
- Advanced Microclimate® technology helps reduce accumulation of heat and moisture at the surface keeping patients skin cool and dry
- Integrated Continuous Lateral Rotation Therapy (CLRT) and Percussion and Vibration functionality
- Turn Assist uses the bed's pressure redistribution surface to help you turn the patient and facilitate easier patient handling
- FullChair® position with chair or side egress — an industry first
- FlexAfoot™ adjustable length can help prevent patients from sliding down in bed
- Head-of-bed angle alarm and trending helps you monitor protocol compliance
- IntelliDrive® powered transport system allows a single caregiver to easily transport a patient in bed
- Single-post patient helper allows patients to autonomously reposition themselves
- Seat and foot deflate for low bed height to help make ingress and egress easier for the patient
- Integrated scale, bed exit and a battery backup

Be ready for every level of acuity.

Due to their size and relative immobility, bariatric patients are likely to suffer from multiple medical conditions² and develop more complications during their stay.³

Be ready with a portfolio that offers maximum flexibility to accommodate a variety of patient needs.

THE EXCEL CARE® ES BED SAFELY SUPPORTS PATIENTS UP TO 1,000 POUNDS

Upper mid-range acuity **EXCEL CARE® ES BED WITH P530 CLRT SURFACE**

- Supports patients up to 1,000 lbs
- Pressure redistribution air surface adjusts to relieve pressure according to patient's weight and height to help prevent and treat pressure ulcers*
- Expandable width frame and surface adjusts from 40-50 inches for greater patient comfort
- Continuous Lateral Rotation Therapy (CLRT) functionality
- Turn Assist uses the bed's pressure redistribution surface to help you turn the patient facilitating easier patient handling
- One-handed CPR allows you quick response in emergencies
- Single-post patient helper allows patients to autonomously reposition themselves
- Seat deflate for low bed height helps make ingress and egress easier for the patient
- Integrated scale and a battery backup

Low-end acuity **BURKE TRIFLEX™ II BED WITH SYNERGY® AIR ELITE SURFACE**

- Supports patients up to 1,000 lbs
- Surface offers low air loss and alternating pressure to aid in the prevention and treatment of pressure ulcers*
- Expandable width frame and surface adjusts from 37-48 inches**
- Integrated pendant and scale enables caregivers to weigh patients with accuracy without transferring them from bed
- Available with an optional trapeze
- Drop down rails make ingress and egress easier
- Battery backup eliminates need to find an outlet when you reposition or transfer patients

*When combined with recommended turning protocols.

**Rental only, 37-54 inches capital

Be ready at every point-of-care.

Bariatric patients have unique medical needs that can make your routine more challenging. By using products that allow you to do more at every point-of-care, you have the flexibility to provide patients the treatment they need — whenever they need it.

Be ready with a range of accessories from patient lifts and stretchers to wheelchairs that work together to help you move patients through every step of recovery.

EASY-TO-USE LIFTS

- *Patient lifts make the manual lifting and repositioning of patients less strenuous and more efficient*
- *With a lifting capacity of 660 lbs, the Viking® XL Lift is ideal for transferring bariatric patients*

GENTLE TRANSFER SYSTEM

- *Barton® Transfer Chair easily converts between a flat and upright mobile chair that allows a single caregiver to easily transfer patients**
- *AirPal® Lateral Transfer System gently raises and glides patients across a frictionless air surface for a smooth transition*
- *The Procedural Stretcher with IntelliDrive® Powered Transport makes it easy for caregivers to transport patients while providing a comfortable ride*

*Maximum recommended weight capacity 660 lbs (rental), 700 lbs (capital)

WITH A LIFTING CAPACITY OF
660 POUNDS,
THE VIKING® XL LIFT
IS A RELIABLE WAY TO
TRANSFER PATIENTS
WITH CONFIDENCE

*The accessories we provide
are designed to create a
comfortable experience for
both patients and caregivers.*

BARIATRIC ACCESSORIES⁴

- *The bariatric wheelchair gives patients who weigh up to 700 lbs the same kind of independence and mobility as other standard care patients*
- *Large-size bariatric walkers and commodes comfortably accommodate up to 1,000 lbs, affording patients dignity throughout every point of care*

LARGE-CAPACITY FURNITURE

- *Bariatric recliners deliver style, comfort and functionality for patients and visitors up to 660 lbs*
- *Large-capacity waiting room chairs provide comfort for patients, friends and family*

Be ready for the needs today.

Recovery is a challenging experience. We make easy-to-use products that help you be ready to deliver effective care to bariatric patients with the sensitivity their size requires.

EASE

All Hill-Rom® bariatric products work together as a family of solutions to meet the increasingly complex needs of a high-risk population. From beds to accessories, we make products that work together to help deliver exceptional care.

DIGNITY

Bariatric patients face many challenges. Our mission is to deliver the highest level of personalized care without compromising

their dignity. We design bariatric products that are both functional and attractive—products tailored for larger patient needs without a bulky appearance.

MOBILITY

Hill-Rom® bariatric products are designed to assist patients through the stages of recovery. Our comprehensive portfolio of products—from beds to lifts—help mobilize patients through every step of recovery.

Be ready for the needs tomorrow.

With clinical expertise and a broad portfolio, we offer services and support to help health care professionals be ready for the challenges ahead.

ROOMBUILDER® DESIGN SERVICES

Hill-Rom's design team will work one-on-one with your planning committee and architect to understand critical design requirements and develop design solutions for bariatric patients.

Be ready with Hill-Rom.

The Hill-Rom® Total Bariatric Solution is more than a smart investment — it helps form a deeper connection with a dedicated long-term partner. We're committed to helping patients and caregivers at every point-of-care, and the Total Bariatric Solution is another great example.
