

ROHO® nexus SPIRIT® Cushion

- *Conforms to an individual's seated shape*
- *Provides low friction/shear environment*
- *Available in single and dual compartment*
- *Facilitates wound healing*
- *Adjustable to change with the individual's position over time*
- *Increased stability for transfers*

The nexus SPIRIT cushion combines the stability of a contoured foam base with the adjustable, Shape Fitting Technology® of a ROHO® DRY FLOATATION® cushion. The contoured foam base is designed to allow for increased stability for transfers as well as provide positioning of the pelvis and lower extremities for enhanced sitting posture. The pelvic bucket is filled with ROHO air cell technology to provide skin/soft tissue protection in this vulnerable sitting region.

SKIN/SOFT TISSUE PROTECTION

Proven with over 40 years of research, experience and refinement, ROHO® DRY FLOATATION® Technology provides an individual with the ultimate in skin and soft tissue protection. The nexus SPIRIT provides skin/soft tissue protection to the ischia, sacrum and coccyx areas through placement of a ROHO DRY FLOATATION cushion in a contoured foam. Unparalleled in performance, the nexus SPIRIT provides an adjustable, low friction/shear environment that helps protect against pressure ulcers.

ENHANCED SITTING POSTURE

The contoured foam is designed to provide improved positioning of the pelvis and lower extremities, enhancing sitting posture.

SHAPE FITTING TECHNOLOGY®

The unique cellular design allows the DRY FLOATATION cushion insert to adapt to movements of the body and constantly conform to it. The cells adapt to meet unique skin/soft tissue integrity needs throughout the day.

STABILITY

The contoured foam base provides increased stability for transfers in and out of the cushion.

ROHO® nexus SPIRIT® Cushion

APPLICATIONS

NEXUS SPIRIT CUSHION IS APPROPRIATE FOR INDIVIDUALS WHO:

- have a history of skin/soft tissue breakdown and/or any stage pressure ulcer (including deep tissue injury), skin grafts, and/or myocutaneous flap surgery
- currently have skin/soft tissue breakdown and/or any stage pressure ulcer (including deep tissue injury)
- are at risk for skin/soft tissue breakdown and/or deep tissue injury
- have normal or impaired sensation
- require accommodation of pelvic asymmetry, up to approximately 1 in. / 2.5 cm
- require increased sitting stability
- require a more stable environment for transfers
- require lower extremity alignment
- require correction of pelvic asymmetry (medial lateral) Dual valve only.

SPECIFICATIONS

INCLUDED:

nexus SPIRIT cushion, cushion cover, hand inflation pump, repair kit, operation manual and product registration card.
