Invacare eForms offer new functionality!

Invacare is pleased to offer you an upgraded solution to your ordering process. Our enhanced order forms allow you to fill out a form electronically, print and fax the form, save and email* it to Customer Service, or maintain the business practices that work for you today. The format has been revised to reveal a cleaner look with electronic selection and input functions.

*Saving and emailing the eForms is available with Acrobat Professional software

If you are using Adobe Reader

- **View** and download all forms
- **Save** blank versions of the forms to your desktop
- **Complete** forms electronically
- **Print** blank or completed forms
- **Fax** completed forms to Customer Service

Please note: The 'Email' button at the end of the form will not work with Adobe Reader. The 'Email' button will only work while using Adobe Acrobat Professional.

If you are using Adobe Acrobat Professional

- **View** and download all forms
- **Save** blank AND completed versions of the forms to maintain electronic records
- **Complete** forms electronically
- **Print** blank or completed forms
- **Fax** completed forms to Customer Service
- **Email** completed forms to Customer Service by using the 'Email' button at the end of the form.

For information on downloading Adobe Reader for free, or purchasing Adobe Acrobat Professional, please visit www.adobe.com.

All prices subject to change without notice.

NOTE: All specifications and dimensions are approximate.

- SPACK Suspension Package \$1449.00 E1015
Not available with HDPG, TRRO, LOSHEAR, LOSHEARWO, RCANE, FLDBACK. Includes DROCK and FLSF.

Transport Tie Down

TRRO includes four factory-installed transport brackets and wheelchair anchored pelvic belt. TRRO has been crash-tested in accordance with ANSI/RESNA WC Vol 1. Section 19 Frontal Impact Test requirements for wheelchairs with a 168 lbs. crash dummy, which corresponds to a person with a weight of 114 lbs. to 209 lbs.

TRBKTS includes four factory-installed wheelchair transport brackets. TRBKTS has not been crash-tested in accordance with WC19. Use these transport brackets only to secure an unoccupied wheelchair during transport.

As of this date, the Department of Transportation has not approved any tie-down systems for transportation of a user while in a wheelchair, in a moving vehicle of any type. It is Invacare's position that users of wheelchairs should be transferred into appropriate seating in vehicles for transportation and use be made of the restraints made available by the auto industry. Invacare cannot and does not recommend any wheelchair transportation systems.

TRANSPORT/VENT TRAY SELECTION

Recliner Back	160°
Weight Limit	300 lbs./400 lbs. with Heavy-Duty Package
Weight	34 1/2 lbs*
Warranty	Lifetime on frame and crossbraces
*Base chair without Accessories	

Available Through Our Specials Departments

- 20" High Reclining Back SM-050503023551
- 80° Footrest Hanger SM-200411121756
- Front Rigging Mount: C-090731110749
Standard on one side and offset on the opposite side

Tilt Assist Explained

The Solara® 3G wheelchair is shipped from the factory pre-configured with one of three "Tilt Assist" settings: *Front, Mid or Rear*, based solely on the seat depth range and seat depth ordered. This setting describes how the user's weight is distributed on the frame itself, i.e., does one front load the chair, rear load or is the weight evenly distributed. As compared to the 2G, the 3G requires up to 30% less force needed to tilt because of these settings. If factors other than seat depth or seat depth range come into play that affect the weight distribution of the chair, the provider has the ability to change the Tilt Assist setting in the field by simply adjusting 2 screws on each side of the frame.

Tilt Assist Factory Setting

	Seat Depth Range 15" - 19"	Seat Depth Range 18" - 22"
D15	Front Setting	
D16	Front Setting	
D17	Mid Setting	
D18	Rear Setting	Front Setting
D19	Rear Setting	Front Setting
D20		Mid Setting
D21		Rear Setting
D22		Rear Setting

The factory setting may need to be adjusted if a seating system is added. The factory setting does not account for conditions outside of the seat depth and seat depth range which may cause more weight to be distributed to the front or back of the chair.

When adjusting the Tilt Assist there are 4 bolts to change (2 on each side.) See the illustration to the left and chart above.

The **Rear** setting has the rocker tube telescoped entirely into the seat frame support tube where the adjustment bolt is in the bottom hole. Along the base frame the bolt is in the top hole. (e.g. accommodates a seat depth that is in the highest end of the seat depth range)

For the **Mid** setting the adjustment bolt is simply in the middle hole along the rocker tube which telescopes out and the middle hole along the base frame. (e.g. optimal for a seat depth in the middle of the seat depth range)

The **Front** setting has the bolt in the top hole of the rocker tube which is fully telescoped out of the seat frame support tube and in the bottom hole along the base frame. (e.g. accommodates a seat depth in the lowest end of the seat depth range)

Comments

Yes, you can.
