

**HUMAN CARE**  
Your Life. Your Way.

**Convertible Chairs**

# Introduction

We produce and provide lifting solutions for people with special needs. Our products are made to serve as a natural part of life to all our users.

Human Care has a proud history in patient care. Founded in 1993, our twenty plus years of experience is expressed through a broad selection of premium products offering high customer value and satisfying all customer needs.

Our main product areas are: Mobility Aids, Lifting Solutions, Healthcare Beds, Convertible Chairs, and Bathroom Safety Products for people with reduced mobility.

With headquarters in Stockholm, Sweden, and subsidiaries in the USA, Canada and Australia, we collaborate with distributors to provide solutions in more than twenty countries.

Our promise is safety, quality and usability. In all of our products, we exercise only the highest quality to make sure that every detail, every aspect, every function will deliver that promise made to our users.

**Welcome to Human Care.**

# Patient Transfer System – Easy transfer performed by one single caregiver

The duties today required of caregivers have become increasingly dangerous due to the constant demand of moving and repositioning patients. This is especially true working with bariatric patients.

Through our PTS system (Patient Transfer System) unnecessary lifting and risk of injury to caregivers is minimized. Our Patient Transfer System (PTS) together with our convertible chairs offer a multitude of positioning capabilities within a single product.

Designed to allow a single caregiver to easily and safely transport and reposition a patient, our chairs can perform the functions of stretcher, mobile chair, and custom seating.

## The Benefits of the Patient Transfer System

The work required of caregivers has become increasingly dangerous due to the constant demand to move and transfer dependent patients. So, we're determined to:

- Make this job easier
- Reduce preventable incidents
- Provide the safest transfer possible
- Help enhance the quality of care provided
- Create a more positive patient experience

**1** Place the chair by bed in stretcher position.

**2** Attach bed sheet to transfer bar.

**3** Transfer patient by turning handle.

**4** Incline chair and you're ready to go!

*” Our mission is to improve the quality of care and freedom of movement for people with special needs ”*

## Care and Quality

A user of a product from Human Care is a person who feels very confident with the product's quality and reliability. At all times. Every step of the way. The reason behind this is our profound commitment to safety, quality and usability.

First, our products are designed and manufactured to meet the requirement of relevant ISO and EN standards. Second, every single product is given extensive attention at every stage of the design process. Third, in developing our products, our design team collaborates with globally leading physiotherapists, creating state-of-the-art products which all share the same ultimate goal: the benefit and enjoyment of their users. Allowing them to live life in the best way possible. Their way.

*” The convertible chair allows one single caregiver to perform safe patient transfers helping reduce the risk of injury for both patient and caregiver. ”*

## Convertible Chairs

Our Convertible Chair series together with our Patient Transfer System offers a multitude of capabilities. Designed to allow a single caregiver to easily and safely transport and reposition a patient, the chairs can perform the functions of stretcher, mobile chair, and custom seating.

## H-250

Convertible chair for moving, repositioning and transferring patients

- Provides safe transfer to and from bed
- Limitless number of positions
- Ideal for home use

The H-250 Convertible Chair is a unique device that easily converts from a stretcher to an upright mobile chair in seconds. Its Tilt-in-Space capability allows for increased blood circulation helping to prevent skin breakdown and other complications of immobility.

With its **113 kg/250 lbs capacity**, the H-250 provides a no-lift solution for moving, repositioning and transferring patients in the safest manner possible.

The H-250 chair together with a Patient Transfer System (PTS) offers the ability to move between a bed and a chair with ease and enables a single caregiver to easily transfer a patient. Read more about our PTS on page 10.

Description	Part no.	Seat width	Overall width	Headrest adjustable height	Maximum user weight	Accommodates varying patient heights
H-250 Chair	B1002-BL	431 mm / 17"	610 mm / 24"	178 mm / 7"	113 kg / 250 lbs	1270 - 1980 mm / 5' 0" - 6' 6"

## I-400

Convertible chair for moving, repositioning and transferring patients

- Unlimited repositioning capabilities
- Easy to turn and maneuver
- Increases the users tolerance for long-term seating

The I-400 chair is a convertible chair for safe and comfortable moving and transferring of patients. It has unlimited number of reclined and tilt positions. The ability to frequently reposition a user significantly reduces the chance of pressure ulcers and increases the users tolerance for long-term seating.

The I-400 chair together with a Patient Transfer System (PTS) offers the ability to move between a bed and a chair with ease and enables a single caregiver to easily transfer a patient. Read more about our Patient Transfer System on page 10.

Central locking/steering casters safe for patient and caregiver

Can be equipped with a patient transfer system. See page 10.

Product	Part no.	Seat width	Overall width	Overall length	Maximum user weight	Accommodates varying patient heights
I-400 Chair	B1041-TS-GEL	546 mm / 21.5"	749 mm / 29.5"	1880 mm / 74"	181 kg / 400 lbs	Manual Tilt and Recline

## I-700

Convertible chair for moving, repositioning and transferring patients

- Tilt-in-space function
- Helps to reduce risk of injuries
- Fully adjustable head support

The I-700 chair offers an unlimited number of reclined and tilt positions. To frequently reposition a user significantly reduces the chance of pressure ulcers and increases the users tolerance for long-term seating.

The I-700 chair can be equipped with a patient transfer system to enable a single caregiver to perform safe lateral transfer to and from bed. Read more about our Patient Transfer System on page 10.

Fully adjustable headrest with support

Can be equipped with a patient transfer system. See page 10.

Product	Part no.	Seat width	Overall width	Overall length	Maximum user weight	Accommodates varying patient heights

# PTS

## Patient Transfer System

- Allows a single caregiver to safely transfer a patient
- Provide the safest transfer possible
- Create a more positive patient experience

Moving a patient can be challenging and unsafe, especially when dealing with heavier patients. All our chairs can be equipped with our unique, easy to adjust Patient Transfer System (PTS).

**Our Patient Transfer System works with** most beds and stretchers and allows a single caregiver to safely and easily transfer a dependent patient with greater frequency and ease without the indignity, discomfort and medical limitations of traditional handling methods.

Product	Included in kit	Part no.
Patient transfer system kit for H-250	2 chair brackets, 5 transfer straps, 2 bed posts, 1 mattress cover (non-slip), 1 Transfer bar, 5 sheet clips, 5 plastic plugs and 2 bed clamps.	b2004e

Patient Transfer System kit for I-700	2 bed brackets, 1 transfer bar, 5 transfer straps and 2 transfer sheets.	b2013a

*"I'm no different from you. I might be older, less agile. My legs are slow but my mind is quick. I have a career. Or maybe I've had one. Either way I'm not slowing down. I can keep up. But some things don't come easy anymore. Small things, and some big ones. Appearance matters, I'm still vain. I'm still happy. I know I need some help, even more than just a little. I don't mind as long as it works. But hey, it is what it is."*
