Simplicity

Straight stairlift

The benefits of a Sterling Simplicity stairlift from Handicare

If you are thinking about installing a stairlift the Simplicity offers you a safe and reliable solution.

Handicare's Sterling Stairlifts have helped thousands of people overcome the problems posed by going up and down their stairs at home.

The Simplicity straight stairlift offers you all the basic functions that you would expect from a stairlift and, if you have a doorway close to the base of the stairs, you can choose from a manually operated hinged track or the unique SlideTrack

that is only available from Handicare.

Supplied in a neutral shade, the wipe clean upholstery will

compliment most color schemes.

The track is fitted to the stairs, not the wall, so you will not need to redecorate following the installation of your Simplicity stairlift.

Like all Handicare Sterling stairlifts the Simplicity has a battery backup which means it will continue to work in the event of a power outage so you do not need to worry about being stranded up or downstairs.

The compact unit folds up leaving the staircase free for other users and also comes with two remote controls which means, once folded, you can move it along the track freeing up space in your hallway. The Simplicity will charge its batteries anywhere on the track that you choose to leave it.

Safety As Standard

Your Simplicity stairlift will come with a range of safety sensors that are designed to stop your stairlift if it meets any obstruction as you travel up the stairs.

Your Simplicity stairlift has a clip operated seat belt for added security and peace of mind.

Smooth & Quiet

Because of the high quality motors we use in our Simplicity stairlifts we are able to offer perhaps the quietest and smoothest stairlift ride available. All backed by a lifetime gearbox and motor guarantee.

Easy to Use

The operating toggle is easy to use, simply hold it towards the direction you wish to travel, up or down, and your Simplicity will move smoothly and gently on its way.

The control is conveniently located at the end of the arm leaving both arms clear to provide unhindered support when getting on or off the seat.
