

## PRODUCT DESCRIPTION

The three wheel **Luggie** supplied has fitted as standard the following features:

- Rear-wheel drive via sealed drive axle.
- 8.5AH/10AH Lithium Battery.
- Manual charging system.
- Off-Board charging facility.
- Seat with folding backrest, height adjustment and adjustable width arm-rests (option).
- A multi-positional handlebar for greater comfort.
- A simple 'wig-wag' type control lever situated on the handlebar, controls speed, braking and direction.
- Steering is controlled by a handlebar attached to a fork system containing the twin front wheel.
- Independent braking systems.
- 'State of the art' micro-controller electronics ensures a smooth , comfortable and safe drive on most surfaces and gradients.

- One piece Alloy Aluminum chassis for ease of transporting.
- Your Scooter can be direct folding, without the use of tools for ease of transporting. **However, your Scooter is not designed to transport the user in a moving vehicle;** for advice on transporting consult your selling agent.
- Simple to remove battery pack.

**The product should be serviced as recommended by an approved Luggie distributor in order to ensure safe, reliable operation. For details and list of options available for users, refer to the accessories section of this manual.**
