

ReactiveAir® by SenTech

Our ReactiveAir® line of powered and non-powered mattresses offer self-adjusting dynamic therapy. ReactiveAir® adjusts to conform to the specific weight, shape and contour of each patient, while the powered ReactiveAir® Pro additionally provides alternating pressure therapy.

A Choice of Therapeutic Solutions

ReactiveAir®

The ReactiveAir® is a non-powered mattress with a network of foam-filled air cells that self-adjusts to the patient's weight or position providing uninterrupted therapy. The mattress can be ordered with integrated raised side bolsters to assist in maintaining the patient in a centered, protected position.

ReactiveAir® Pro

ReactiveAir® Pro transforms the non-powered ReactiveAir® mattress into a powered system. Attaching the lightweight controller to the ReactiveAir® mattress, provides the enhanced benefit of alternating pressure therapy. The result is a dual functioning system that delivers continuous self-adjusting and alternating pressure therapies in one product.

Support Surface Features

- Eight horizontal foam-filled air cells offer self-adjusting support from the head to the lower legs
- Dual-layered, 5-zone convoluted foam topper improves patient comfort and pressure redistribution
- Uniquely-designed heel zone reduces pressures in critical heel section
- Firm perimeter assists in keeping the patient centered, provides side-of-bed seating support, and facilitates ingress/egress
- Articulation slots allow mattress to bend with bed frame
- Replaceable 4-way stretch cover is moisture vapor permeable and fluid proof
- Transport handles
- Non-powered bariatric models available in select sizes

Specifications

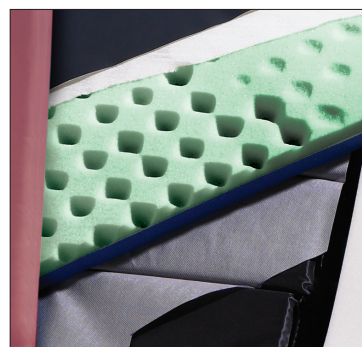

- Standard dimensions: 36"x80"x7" with additional sizes available
- Controller for **ReactiveAir® Pro**:
 - Adds alternating pressure therapy
 - Dimensions: 10" x 8.5" x 3.5"
 - Weight: 5 lbs.
 - Electrical: 110 – 120 V/60 Hz
 - 0.05A/ 10W Max
- Standard weight capacity is 400 lbs.
- Bariatric models (**non-powered ReactiveAir® only**) support patients ranging from 500-850 lbs.
- Warranty: 5 years on mattress core, 2 years on mattress cover, 1 year on ReactiveAir® Pro controller
- Medicare Codes: ReactiveAir® E0184, ReactiveAir® Pro E0277

Articulation slots allow mattress to bend with the bed frame.

In addition to the heel slope, special custom cuts in the foam redistribute pressures in the critical heel section.

Anatomic zoning: five distinct pressure zones redistribute weight and reduce overall pressure profile.

Dynamic pressure delivery system utilizes a vent and check valve system to automatically and precisely adjust the support characteristics.
